¹ Dispense only for clinic administration by a healthcare provider

Important information regarding product availability and dispensing limitations:

1. This formulary lists medications that are currently available at the Naval Medical Center and Branch Clinic Pharmacies. Changes to this list or guidelines may be made without prior notice. For update on a specific medication, please contact the pharmacy department.

Time limitations and quantity restrictions:

2. Prescriptions for Schedule II (C-II) medications expire 30 days from the date written, after which they cannot be filled at NAVY pharmacy locations. Federal DEA law prohibits refills. Quantity is limited to 30 doses for routine prescriptions, or a 30-day supply if used to treat chronic pain or cancer pain. Any exceptions require Pharmacy Service Line Leader approval. The provider must document the specific indication of "chronic pain", "cancer pain", "tumor board", or "pain clinic patient" on the prescription. Prescriptions for ADHD therapy may be written for up to a 100-day supply. Demerol (meperidine) prescriptions are limited to 30 tablets.

3. Prescriptions written for Schedule III-V (CIII-V) medications expire 6 months from the date written, after which they cannot be filled or refilled. Quantity is limited to a maximum of 30-day supply and 5 refills. Exception: Prescriptions for clonazepam, phenobarbital, and mephobarbital documented with seizure indications can be filled for a 90-day supply with 1 refill. Zolpidem prescriptions are limited to a 30 day supply.

4. Prescriptions written for non-controlled medications (C-VI, "Rx Only", and OTC/non-Rx) expire one year from the date written, after which they cannot be filled or refilled. Quantity is limited to a 90-day supply and 3 refills for most maintenance medications.

5. Drug and Class specific restrictions and exemptions:

- Tussionex: 60ml Exception: documented chronic cough at pharmacist discretion
- Oral Contraceptives: 6-month supply (with 1 refill)
- Bulk Compounded Medicines that are on the Formulary are open to all
- Non-formulary products are restricted to staff providers with appropriate justification. Navy Regulations prohibit military providers from rewriting civilian prescriptions. Non-formulary prescriptions are referred to mail order or retail sources (see notes below).
- Ciprofloxacin quantity limit is 20 tablets; gatifloxacin limit is 10 tablets without justification
- Tretinoin (Retin-A, others) restricted to patients less than 35 years of age, unless written by Dermatologist for medical reasons (wrinkling is not considered a medical reason)
- Alprostadil: Edex: 2 boxes (8 syringes) and Muse 1 box (6 pellets) per 30 days.
- Tricyclic Antidepressants (TCA's) will be filled as written up to a 90 day supply at the discretion of the duty pharmacist. Quantity dispensed must not exceed what is ordered by the provider.
- Nonformulary "triptan" migraine agents are limited to one pack per prescription (i.e. 1 box). Formulary triptans (sumatriptan, zolmitriptan) are limited to 9 tablets per prescription. Sumatriptan injections are limited to 4 per month. Sumatriptan nasal spray is limited to two units per month. This policy may be overridden with appropriate justification from a neurology provider and at pharmacist's discretion.
- Fioricet and Fiorinal prescriptions are limited to 30 tablets/capsules unless justification provided.

k. Pharmacy will automatically convert military provider prescriptions for calcium + vitamin D to plain calcium when concurrently ordered with combination alendronate-vitamin D tablets.
l. Isotretinoin prescriptions are only dispensed from NMCP pharmacy during the hours of 0800 – 2200 and must be picked up within 7 days from the date the prescription was written. Dispensing limited to a 30 day supply- no refills. Only the NMCP facility processes isotretinoin prescriptions. Patient and ordering provider must be registered with the iPLEDGE program and must fully comply with all requirements (www.iPLEDGEprogram.com).
m. Valacyclovir prescriptions are limited to a 7 day supply unless documented acyclovir suppression therapy failure.

6. Telephone prescriptions will NOT be accepted. Photocopy of prescription and fax will also NOT be accepted. By Navy Regulation, "Take as directed," in most circumstances, is not considered adequate instruction and should be avoided.

7. Refills must be called in: (757) 953-MEDS (953-6337) or toll free (866) 285-1008. Refills will be ready for pickup in 2 working days. Refills not picked up within 7 working days will be returned to stock.

8. Ondansetron (Zofran), granisetron (Kytril) and related agents: Limit 15 tabs/30 days. For nausea/vomiting in pregnancy, providers must follow ACOG (American College of Obstetrics and Gynecology) protocol.
